

- REACH - Conformity Declaration

Declaration referring to directive EG 1907 / 2006 for the registration, evaluation, approval and limitation of chemical substances (REACH).

The REACH directive intends that chemical substances which are produced in higher amounts than one ton per year may only be sold within the countries of the European Union by prior registration.

We do not produce nor import any of these substances or composites which the REACH regulation pertains.

REACH directive means for STEECO Germany GmbH that it is a "downstream user". SO STEECO is not committed to registration and is not obliged to issue safety data sheets.

The goods which are delivered by STEECO Germany GmbH are manufactured and cannot be defined as substances or composites. Our products do not evaporate any substances.

With regard to our concern for STEECO Germany GmbH and our customers we remain in steady contact with our manufacturing partners in order to assure that all delivered products correspond to the REACH directive. Our manufacturing partners are also obliged to inform us without request and without delay, if the products contain a SVHC substance (substances of very high concern) exceeding the limit 0.1 mass percent.

In case we receive such an information and hereby gain knowledge that in our products the limit of 0.1 mass percent of SVHC substance is exceeded, we will inform the corresponding parties immediately.
